

**APPROVED REGULATION OF THE
BOARD OF WILDLIFE COMMISSIONERS**

LCB File No. R082-23

Filed February 27, 2024

EXPLANATION – Matter in *italics* is new; matter in brackets ~~[omitted material]~~ is material to be omitted.

AUTHORITY: §§ 1 and 2, NRS 488.045, 488.059, 501.181 and 501.243; § 3, NRS 501.105, 501.110 and 501.181; §§ 4 and 5, NRS 501.105, 501.181, 503.300 and 503.310.

A REGULATION relating to wildlife; revising provisions relating to the operation of vessels on certain waters in this State; classifying the Dixie Valley toad as endangered; revising the type of fishing lures that may be used in certain waters in this State; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

Existing law requires the Board of Wildlife Commissioners to establish policies to promote the safety of persons using vessels on the waters of this State. (NRS 501.181) Existing regulations establish the maximum speed at which a vessel may be operated on certain waters in this State. (NAC 488.455) Existing regulations also require that only a vessel without a motor or powered by an electric motor is allowed to be operated on certain waters in this State. (NAC 488.470) **Section 1** of this regulation removes the maximum speed at which a vessel may be operated on the waters of the Knott Creek Reservoir in Humboldt County and, instead, **section 2** of this regulation provides that only a vessel without a motor or powered by an electric motor is allowed to be operated on the waters of the Knott Creek Reservoir. **Section 2** also establishes that only a vessel without a motor or powered by an electric motor is allowed to be operated on the waters of the Tonkin Springs Reservoir in Eureka County.

Existing law requires the Commission to adopt regulations to classify wildlife and authorizes the Commission to change the classification of a species of wildlife when doing so is in the public interest. Existing law requires the Commission to classify amphibians as game amphibians, protected amphibians or unprotected amphibians. Existing law authorizes the Commission to further classify protected amphibians as sensitive, threatened or endangered. (NRS 501.110) Effective December 2, 2022, the United States Fish and Wildlife Service of the Department of Interior listed the Dixie Valley toad as an endangered species under the federal Endangered Species Act of 1973, as amended, which had the effect of continuing the designation of the Dixie Valley toad as endangered under a temporary emergency rule issued by the United States Fish and Wildlife Service on April 7, 2022. (87 Fed. Reg. 73971 (Dec. 2, 2022)) Existing regulations classify the Dixie Valley toad as protected under state law, and **section 3** of this regulation further classifies the Dixie Valley toad as endangered under state law. (NAC 503.075)

Existing law authorizes the Commission to establish by regulation the types of bait and methods by which bait may be used in any designated water. (NRS 503.300) **Section 4** of this regulation revises the types of fishing lures authorized to be used in the Hobart Reservoir. **Section 5** of this regulation revises the types of fishing lures authorized to be used in the Smith Creek Reservoir and on the Snake Range High Lakes.
