

**REVISED ADOPTED REGULATION OF THE
NEVADA STATE BOARD OF OPTOMETRY**

LCB File No. R045-15

Effective June 28, 2016

EXPLANATION – Matter in *italics* is new; matter in brackets ~~[omitted material]~~ is material to be omitted.

AUTHORITY: §1, NRS 636.125 and 636.2891.

A REGULATION relating to optometry; revising provisions governing the treatment of persons diagnosed with glaucoma; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law authorizes an optometrist to treat persons diagnosed with glaucoma only if the optometrist has been issued a certificate by the Nevada State Board of Optometry to do so. (NRS 636.2891) To obtain such a certificate, the optometrist must have treated at least 15 persons who were diagnosed with glaucoma in consultation with an ophthalmologist for at least 12 consecutive months. (NRS 636.2893) Existing regulations require an optometrist who treats persons for glaucoma in consultation with an ophthalmologist to conduct an optometric examination of each such patient at least once every 4 months for not less than 1 year. (NAC 636.290) This regulation eliminates the requirement that optometric examinations be conducted at least every 4 months and requires instead that the optometrist: (1) establish a course of treatment for each patient; and (2) conduct optometric examinations at least three times over a period of not less than 1 year at times set forth in the course of treatment.

Section 1. NAC 636.290 is hereby amended to read as follows:

636.290 1. An optometrist who treats persons for glaucoma in consultation with an ophthalmologist pursuant to NRS 636.2891, 636.2893 and 636.2895 shall:

(a) *Establish a course of treatment for each patient in accordance with the provisions of this section;*

(b) Conduct ~~{an}~~ *at least three* optometric ~~{examination}~~ *examinations* of ~~{the}~~ *each* patient ~~{at least once every 4 months for}~~ *over a period of* not less than 1 year ~~{;}~~ *at times set forth in the course of treatment;*

~~{(b)}~~ (c) Provide written records of each examination of a patient and the treatment to the consulting ophthalmologist; and

~~{(c)}~~ (d) Refer the patient to an ophthalmologist for further examination or treatment if the ophthalmologist determines, after reviewing the written records, that such a referral is necessary.

2. Within 30 days after a consulting ophthalmologist receives the records of an optometric examination and a course of treatment from an optometrist, the consulting ophthalmologist shall notify the optometrist in writing as to whether the consulting ophthalmologist agrees to the course of treatment outlined by the optometrist.

3. During the period before an optometrist is certified to treat persons diagnosed with glaucoma, the optometrist shall not treat any patient found to have any of the conditions or complications set forth in NRS 636.2891 which require referral of such patients to an ophthalmologist.

4. The records of each patient created as a result of treatment provided by an optometrist in accordance with the provisions of this section and NRS 636.2891:

(a) Must be retained by the optometrist for not less than 5 years as required by NRS 629.051; and

(b) Are subject to examination by the Board.
