Legislative Counsel's Digest:

 Existing federal law prohibits the introduction of a drug or biological product into interstate commerce if the drug or biological product has not received approval from the United States Food and Drug Administration. (21 U.S.C. § 355; 42 U.S.C. § 262) Existing federal regulations allow expanded access to investigational drugs

and biological products for patients who have a serious or immediately
life-threatening illness under certain circumstances. (21 C.F.R. Part 312, Subpart I)
Existing Nevada law makes it a misdemeanor for any person to possess, procure,
obtain, process, produce, derive, manufacture, sell, offer for sale, give away or
otherwise furnish any drug which may not be lawfully introduced into interstate
commerce under the Federal Food, Drug and Cosmetic Act. (NRS 454.351)

11 Section 1 of this bill authorizes the manufacturer of an investigational drug, 12 biological product or device to provide or make available the investigational drug, 13 biological product or device to a patient who has been diagnosed with a terminal 14 condition that will, without the administration of life-sustaining treatment, result in 15 death within 1 year if a physician prescribes or recommends the investigational drug, biological product or device. Section 1 defines "investigational drug, 16 17 biological product or device" as a drug, biological product or device that: (1) has 18 successfully completed Phase 1 of a clinical trial; (2) has not been approved by the 19 United States Food and Drug Administration; and (3) is currently being tested in a clinical trial that has been approved by the United States Food and Drug Administration. Section 1 also makes it a misdemeanor for any officer, employee or agent of this State to prevent or attempt to prevent a patient from accessing an investigational drug, biological product or device if certain requirements are met. Additionally, section 2 of this bill removes the criminal penalty otherwise imposed against a person who engages in certain acts that make an investigational drug or biological product available when certain requirements are met.

20 21 22 23 24 25 26 27 28 29 30 31 32 33 4 35 36 37 38 Because a prescription or recommendation from a physician is required before a patient may obtain an investigational drug, biological product or device, sections **3** and **8** of this bill authorize a physician to issue such a prescription or recommendation if the physician has: (1) diagnosed the patient with a terminal condition; (2) consulted with the patient and the patient and physician have determined that no treatment currently approved by the Food and Drug Administration is adequate to treat the terminal condition; and (3) obtained informed, written consent to the use of the investigational drug, biological product or device from the patient or his or her representative, parent or guardian. Sections **3** and **8** also require such informed, written consent to be provided on a form that contains certain information about the possible consequences of using the investigational drug, biological product or device. Additionally, sections 5, 7 and 9 39 of this bill provide that a physician or person engaged in the practice of 40 professional nursing who procures or administers a controlled substance or 41 dangerous drug is not subject to professional discipline if the controlled substance 42 or dangerous drug is an investigational drug or biological product prescribed by a 43 physician.

1 WHEREAS, The process to approve investigational drugs, 2 biological products and devices often takes many years; and

WHEREAS, Patients who have a terminal condition do not have the luxury of waiting until an investigational drug, biological product or device receives final approval from the United States Food and Drug Administration; and

7 WHEREAS, The standards of the United States Food and Drug 8 Administration for the use of investigational drugs, biological 9 products and devices may deny potentially life-saving treatments to 10 terminal patients; and

1 WHEREAS, This State recognizes that patients who have a 2 terminal condition have a fundamental right to attempt to pursue the 3 of their own lives by accessing available preservation investigational drugs, biological products and devices; and 4 5 WHEREAS, The decision to use an available investigational drug, 6 biological product or device should be made by a patient with a terminal condition in consultation with his or her physician and is 7 not a decision to be made by the government; now, therefore, 8 9 10 THE PEOPLE OF THE STATE OF NEVADA, REPRESENTED IN 11 SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS: 12 13 Section 1.
