AN ACT relating to mammography; revising the language of certain notices provided to patients who undergo mammography; and providing other matters properly relating thereto.

**Legislative Counsel’s Digest:**

1 Existing law requires that a patient who undergoes mammography must be  
2 given a notice which includes a report of the patient’s breast density and which may  
3 include, without limitation, a statement regarding the relationship between breast  
4 density, breast cancer and the impact of breast density on the effectiveness of  
5 mammography. (NRS 457.1857) Pursuant to existing law, the State Board of  
6 Health adopted a regulation prescribing the language of such a notification. (LCB  
7 File No. R100-13 which became effective on January 1, 2014) This bill provides  
8 new language which must be used in such notification if the report indicates that  
9 the breast tissue is dense.
