

Dear Legislative Commission Members,

Please record my adamant opposition now and for all future vaccine mandates.

This is an egregious attempt to change Nevada law and administrative code to implement CDC *guidelines - not law* issued by a non-elected body in manner that will harm Nevadans.

Please see my justification below:

Dr. McCullough: 10 Reasons to drop vaccine support or mandates.

1. Covid-19 vaccination is voluntary research.
2. Covid-19 vaccines do not not work well enough.
3. Covid-19 vaccines do not protect against the increasingly prevalent Delta variant.
4. Cover-19 vaccines have a dangerous mechanism of action.
5. There is a burgeoning number of cases of myocarditis or heart inflammation among individuals below the age 30 years.
6. The U.S. FDA has given an update on the JNJ vaccine concerning the risk of cerebral venous sinus thrombosis in women ages 18-48 associated with low platelet counts.
7. Covid-19 are generating record safety counts.
8. People are dying and being hospitalized in record numbers in the days after Covid-19 vaccinations.
9. The safety profile is unknown.
10. Any personal choice or protected health information concerning the Covid-19 vaccine and its complications is confidential and anonymous according to federal law; otherwise, you will be subject to additional federal fines and penalties for violation of protected health information laws and statutes.

Dr. McCullough has 40 peer-reviewed publications on the infection and has commented extensively on the medical response to the COVID-19 crisis in TheHill and on FOX NEWS Channel. On November 19, 2020, Dr. McCullough testified in the US Senate Committee on Homeland Security and Governmental Affairs and throughout 2021 in the Texas Senate Committee on Health and Human Services, Colorado General Assembly, and New Hampshire Senate concerning many aspects of the pandemic response.

Dr. McCullough's qualifications:

Dr. McCullough is an internist, cardiologist, epidemiologist, and Professor of Medicine at Texas A & M College of Medicine, Dallas, TX USA. Since the outset of the pandemic, Dr. McCullough has been a leader in the medical response to the COVID-19 disaster and has published “Pathophysiological Basis and Rationale for Early Outpatient Treatment of SARS-CoV-2 (COVID-19) Infection” the first synthesis of sequenced multidrug treatment of

ambulatory patients infected with SARS-CoV-2 in the American Journal of Medicine and subsequently updated in Reviews in Cardiovascular Medicine.

Here are his credentials:

Peter A. McCullough, MD, MPH, FACP, FACC, FAHA, FCRSA, FCCP, FNKF, FNLA

Professor of Medicine, Texas A & M College of Medicine

Board Certified Internist and Cardiologist

President Cardiorenal Society of America

Editor-in-Chief, Reviews in Cardiovascular Medicine

Editor-in-Chief, Cardiorenal Medicine
