Senator Lamb asked the Committee how they wanted to handle A. B. 121. Senator Hilbrecht said that Senator Wilson had a couple of suggestions for amendments for the bill. He said he felt that something had to come out of that bill. Senator Young suggested that that should be everything after the number. Senator Hilbrecht said that he objected and he thought that the medical profession and everybody agreed that having the Board of Health get involved in doctors' licensing is boloney. He said they had not adopted his amendment because his amendment did not have that language in it. When it came out of committee, it was plain that it was his amendment but it had something about classifying physicians in it and he said that had to be deleted if they did nothing else. Sen. Lamb asked if there was any appetite for separating the two drugs. Senator Young said he could go for Laetrile but not for anything beside that. Senator Hilbrecht said he would go either way. He said he had told them when the bill first came over that he would not support the bill unless it had some regulatory review and he thought they agreed so he felt he would be going back on his commitment if he refused to vote for it unless it had further modifications. He said he felt the way it was now it should be a revenue producing measure, not a cost to the state. Senator Glaser asked if they were to review the merits of the bill or just the fiscal note.
