SB 164 Provides state reimbursement of costs of hospital care for certain indigents injured in motor vehicle accidents. (Attachment A)

Russ McDonald introduced this bill, describing the impact on counties from medical expenses caused by accidents happening, largely, on Interstate 80.

Senator Lamb remarked that if this bill is passed, the hospitals will not even try to collect the money.

SB 470 Establishes program to research therapeutic effects of marihuana on certain cancer and glaucoma patients. (Attachment B)

Dr. John Carr, State Health Officer, and Paul Cohen, Administrative Health Services Officer testified in favor of SB 470.

Mr. Cohen stated that Nevada does not have to pass legislation for the State Board of Health to submit a protocol package for the research of therapeutic effects of marihuana on cancer and glaucoma patients. He said there are 35 states presently involved in legislative activities and/or activities towards this. He said the model for SB 470 came from New Mexico. Mr. Cohen also described a fiscal note he had prepared. (Attachment C)

Senator McCorkle asked if the purpose of this program is to treat glaucoma; or to do research, along with 35 other states. Mr. Cohen replied that, specifically, the intent of the bill is to do research on cancer and glaucoma patients.

Senator McCorkle questioned whether Nevada should duplicate the efforts of 35 other states. Mr. Cohen stated there are 8 states doing research now, and 35 looking at doing additional research. He said Nevadans cannot go out of state for research purposes. Mr. Cohen thinks that is the reason for the bill in the first place; to try to get the research in-state for Nevadans to use.

(SB 470 - continued)

Senator Echols asked if marijuana has been used successfully as a medicine. Dr. Carr said it has provided help to people with terminal cancer in helping to control pain and undesirable symptoms associated with chemotherapy. It is also successful in the treatment of glaucoma patients. Dr. Carr said marijuana definitely benefits some patients.

Senator Echols and Mr. Cohen discussed the moral issue of using marijuana as a medicine, when it is legally banned to the public.

Senator Gibson asked the program will be carried out; will it be free to participants? Mr. Cohen answered yes, the federal government, by law, cannot charge for the chemical compound during the research. Mr. Bennett from the State Board of Pharmacy said they have no problem with additional staff requirements in terms of controlling the distribution of it. Mr. Cohen quoted Mr. Bennett further in that his office has no problem with the amount of time involved in insuring that regulations are being followed. Later on the program will have to be self-supporting. The request is for start-up costs to get the program going.

Senator McCorkle said on page 2, lines 20 through 25, of the bill, the language is loose. Mr. Cohen replied that because they would be working with a controlled substance, they are quite restricted. He said each person in the program must satisfy federal requirements.

Senator Jacobsen asked if it is necessary to have another separate board. Mr. Cohen said it is not a separate board.

Tom Danzinger, Nursing Student, UNR, testified in favor of SB 470. He said he has been personally associated with patients who have benefited from marijuana. In answer to Senator Jacobsen's question, Mr. Danzinger replied that marijuana is not addictive.

SB 569 Requires that fees collected for issuance of drivers' licenses be deposited in state general fund. (Attachment D)

John Crossley, Legislative Auditor and Leonard Winkelman, Chief, Administrative Services, DMV, described the proposed amendments to SB 569. (Attachment E) Mr. Crossley stated that, with the passage of this bill, the accounting would be "cleaner".

SB 573 Allows travel and moving expenses to certain state employees recruited from outside the state. (Attachment F)

Jim Wittenberg, Chief, Personnel Division, testified for SB 573. He said they found in some cases that for some positions, for example a chief engineer, moving expenses were a critical issue. He proposed that moving expenses be limited to difficult-to-recruit positions such as public service commission auditor. Mr. Wittenberg said there is no fiscal note because there will be a vacancy while they are recruiting, which will pay for expenses.

Senator Lamb added that providing these expenses is not unusual in the private sector.

Senator McCorkle asked if a regulation would be put in the bill that, if an employee quits in a certain length time, all or part of the moving expenses will be reimbursed. Mr. Wittenberg said he felt certain that this will be done.

AB 6 Requires repayment of costs of modernizing state printing plant, makes appropriation and extends time of reversion of previous appropriation. (Attachment G)

Donald Bailey, State Printer, State Printing Officer, described and testified for AB 6.

(AB 6 - continued)

Senator Lamb asked if any money can be taken out of this bill. Mr. Bailey said the study was done in October 1978, and prices have risen since then; no money should be cut from AB 6.

AB 299 Makes appropriation to division of environmental protection of state department of conservation and natural resources to purchase monitoring equipment. (Attachment H)

Ernest Gregory, Administrator, Environmental Protection Division, testified in favor of AB 299. (Attachment I)

Senator Lamb asked where air pollution equipment is placed. Mr. Gregory said they try to locate instruments where they believe there is maximum impact from whomever is polluting.

Senator Lamb asked if only this information is considered, or the overall picture. Mr. Gregory said the way the federal act is written, the standard cannot be violated anywhere. He said the air may be fine half a mile away. He said when measuring automobile pollution they put instruments where people are likely to be; not in the street, as California measures it.

Senator Echols asked what happens with the information when pollution standards are exceeded. Mr. Gregory said they report it to the federal government.

Senator Lamb asked if other measurements, further away from the location of the offense, are also reported to the federal government. Mr. Gregory said that sometimes they were.

Mr. Gregory said that implementing plans to comply with federal air standards is critical. If plans are not approved, the state could lose all highway construction funds, all HUD funds, etc.

Senator Echols asked how pollutants are removed from the air once they are there. He said electric cars used for transporting people to work would eliminate much pollution in the Las Vegas area.

Senator McCorkle asked if the equipment in this bill is necessary to meet federal standards; or can the agency get by with the present equipment. Mr. Gregory replied the bill is necessary to satisfy federal requirements and they cannot get by with what they have.

Senator Jacobsen asked, regarding Lake Tahoe, does California have the same monitoring equipment, used in the same areas, as Nevada does. Galen Flinn, Environmental Protection Division, explained the similarities and differences in Nevada's and California's monitoring equipment and placement of same.

AB 372 Makes supplemental appropriation for operation of children's behavioral services. (Attachment K)

2655

(AB 372 - continued)

Dr. Bing Oberle, Administrator, and Ted Reynolds, Business Manager, Division of Mental Health and Mental Retardation, testified for and described AB 372.

AB 385      Sets accrual rate of annual leave for state employees hired on or after July 1, 1979, and who have less than three year's service. (Attachment L)

Jim Wittenberg, Chief, Personnel Division, described this bill. He said it is part of the pay package.

AB 725      Provides for Nevada industrial commission to submit its proposed budget to chief of budget division of department of administration. (Attachment M)

Mr. Sparks briefly described AB 725.

Senator Lamb said he would like to amend line 27 to require NIC to submit a budget; and not leave it to the request of the Chief.

Senator McCorkle said there may be so little flexibility in the way NIC runs, that the legislature has little grounds for criticizing their budget.

Senator Gibson said part of NIC's trouble is that they will not share information; this draws suspicion and criticism of them. He said going through the budget process would help clear the air for them. Senator Lamb concurred with this.

Senator Gibson said there is more than NIC's budget; there is also the judicial department. He asked what would be the effect of removing "at the request of the Chief". Mr. Barrett said then they would have to go to the retirement system for figures etc.

Senator Gibson asked Mr. Barrett if he would object to doing this. Mr. Barrett said no.

Senator Echols moved to amend AB 385 (line 27) to remove "at the request of the Chief."

Seconded by Senator Jacobsen.

AB 804      Authorizes establishment of restitution centers by department of prisons and provides for payment by certain offenders of restitution to victims of their crimes. (Attachment N)

Mike Medema, Chief Administrative Officer, Dept. of Prisons, introduced AB 804. He said some costs would be deferred by payments from the prisoner. (Attachment O)

Senator Gibson asked where the restitution center is located. He said they have a \$2,000 a month facility near Las Vegas, which will house up to 40 inmates. He said the Reno center will also house up to 40 inmates. The budget is based on 30 inmates; they hope to have more beds than this, but with the turnover, 30 is an effective number on a constant basis.

Senator Lamb suggested that insurance be taken out on these people, who will be free in the community. Mr. Medema said they have a

(AB 804 - continued)

field supervisor to make sure inmates are on their jobs, etc.

Senator Gibson asked why a former, similar program was not cost effective. Mr. Medema said because there were many federal staffing restrictions; and the administration of the prison at that time did not have a commitment to make it work.

Senator Lamb asked Warden Wolff if he anticipates problems with inmates in this proposed program. Mr. Wolff said he always expects problems with inmates. He said there will be problems in a community-based setting; someone will walk off or get drunk. However, he said it is a good program because most prisoners will be trying to make restitution. He said work release programs are working well today. The secret to success is classifying the right people for the program. He added that no insurance company would insure inmates.

Mr. Sparks asked, if AB 804 passes, is the budget that Ways and Means approved adequate for both northern and southern Nevada? Mr. Medema answered that Ways and Means eliminated educational buildings in favor of restitution centers. Mr. Wolff added that restitution centers have a higher priority than the educational buildings.

Senator McCorkle asked if the fiscal note of \$406,000, includes money that will be anticipated by the prison. Mr. Wolff answered that anticipated income is included in the fiscal note. Mr. Medema added that most restitution centers are not self-sustaining; but they reduce the costs of incarceration by approximately half.

Senator Gibson moved "Do Pass" AB 804.

Seconded by Senator Jacobsen.

Motion carried.

Senators Glaser and Wilson absent.

AB 385 (Attachment L)

Senator Echols moved "Do Pass" AB 385.

Seconded by Senator Jacobsen.

Motion carried.

Senators Wilson, Gibson, Glaser absent.

AB 299 (Attachment H)

Senators Lamb, Echols, and McCorkle said they would rather not pass this bill. Mr. Barrett stated that if the monitoring is not done, for which the requested equipment is necessary, the federal government can eliminate other funds. Senator Lamb commented that having Nevada monitor pollution may be a protection against the federal agency.

Senator McCorkle moved "Do Pass" AB 299.

Seconded by Senator Echols.

**EXPLANATION**—Matter in *italics* is new; matter in brackets [ ] is material to be omitted.

AN ACT making an appropriation from the state general fund to the division of environmental protection of the state department of conservation and natural resources to purchase monitoring equipment; and providing other matters properly relating thereto.

*The People of the State of Nevada, represented in Senate and Assembly, do enact as follows:*

1     **SECTION 1.** There is hereby appropriated from the state general fund  
2 to the division of environmental protection of the state department of  
3 conservation and natural resources the sum of \$128,600 to purchase  
4 monitoring equipment for the air pollution control programs.

5     **SEC. 2.** After June 30, 1981, the unencumbered balance of the

8     **SEC. 3.** This act shall become effect upon passage and approval.

SPECIAL APPROPRIATION

ATTACHMENT I

A crucial part of the State's air pollution control program is monitoring of the ambient air to determine the concentrations of the pollutants. The pollutants are carbon monoxide, ozone, sulfur dioxide, and certain compounds of nitrogen. The monitoring of air quality, especially in urban areas, is necessary to determine if the Federal air quality standards are being met or exceeded. If the standards are exceeded, the area involved must develop a plan to control air pollution sources to meet the Federal standards. Failure to develop and implement such a plan can result in withholding of any source of Federal funds for any project in an area where such a project would contribute to further air pollution.

Proper monitoring equipment to measure air pollutants is necessary to determine compliance or noncompliance with federal standards. In noncompliance areas the degree of pollution must be measured with some accuracy to provide the policy makers with the information to determine the types and degree of controls necessary, i.e., traffic controls, roadway construction, industries that can or cannot be permitted in the area, etc.

The pollutants which must be measured are carbon monoxide, ozone, sulfur dioxide, and certain compounds of nitrogen. The equipment which the Division of Environmental Protection currently has was purchased over five years ago. Maintenance of the equipment is becoming almost impossible because replacement parts are not available. In addition the equipment must be capable of measuring the pollutant with a fair degree of reliability and accuracy for the data to be accepted by the federal government.

To meet the Federal Reference or Equivalent as required under the proposed amendments to 40 CFR 50 and 51 and the current Standard Air Monitoring Work Group guidelines requires replacement of the present carbon monoxide, two ozone and sulfur dioxide analyzers. The remaining equipment would be used to outfit a laboratory trailer for special studies in several areas of the State and used as a backup station for new air pollution source oriented monitoring in Prevention of Significant Deterioration areas as required under EPA's Prevention of Significant Deterioration Regulations and Guidelines.

Each piece of equipment would require a strip chart recorder and signal averager for data handling. The signal averagers facilitate data reduction and would save approximately one man-year by eliminating the need for manual processing. Data loggers interface with available computer facilities for manipulation and storage of acquired data.

*See with  
Environmental Protection  
Department*

The following equipment is being requested:

2 Carbon Monoxide Analyzers @ \$10,00 ea. . . . .	\$ 20,000
3 Ozone Analyzers @ \$8,000 ea. . . . .	\$ 24,000
1 Sulfur Dioxide Analyzer @ \$12,000. . . . .	\$ 12,000
2 Nitrogen X Analyzers @ \$10,000 ea. . . . .	\$ 20,000
8 Strip Chart Records @ \$1,500 ea. . . . .	\$ 12,000
8 Signal Averagers @ \$1,200 ea.. . . .	\$ 9,600
2 Data Loggers @ \$8,000 ea.. . . .	\$ 16,000
	<u>\$ 113,600</u>

In addition to the above itemized equipment a minimum of \$15,000 is required for accessories and start up expenditures. This funding would be used for purchase of span gases, National Bureau of Standards traceable standards, tubing, connectors, sampling manifolds, and other items necessary to produce a working system for the instruments.

TOTAL REQUEST \$128,600

General

ATTACHMENT O

The Clark Restitution Center is designed to facilitate 30 to 40 inmates living at a site within the community. The purpose of the restitution center is to provide housing for those persons agreeing to participate in the restitution program and being judged eligible by the responsible parties. The persons participating in this program will provide a portion of their incomes for support of the program. This program is not entirely self-sufficient but will operate at a daily state supported rate lower than the institutions.

The budget request to support this program is:

	<u>FYE 6/30/80</u>	<u>FYE 6/30/81</u>
<u>Revenues</u>		
General Fund	\$155,167	\$123,269
Client Income	48,000	72,000
Total Revenues	<u>\$203,167</u>	<u>\$195,269</u>
<u>Expenditures</u>		
01 - Salaries	\$107,607	\$113,195
04 - Operating	64,230	82,074
05 - Equipment	31,330	-0-
Total Expenditures	<u>\$203,167</u>	<u>\$195,269</u>

Client Income

The average income of the restitution center clients is estimated at \$4.00 per hour or \$8,320 per annum. The Department proposes to charge the clients \$200 per month or \$2,400 per annum as a residence fee, an contractually agreed upon program participation stipulation. The average number of clients participating in the program is expected to approximate 30 after initial program development. The development stage is projected to be four months of the initial year of funding. Accordingly, the revenues predicted are:

	<u>FYE 6/30/80</u>	<u>FYE 6/30/81</u>
Client Income	<u>\$48,000</u>	<u>\$72,000</u>
<u>01 - Salaries</u>		

The staff necessary to operate the restitution center is:

1. Lieutenant - the Lieutenant is responsible to the Deputy Director for all phases of the restitution center's operation. The basic duties include security of the center, supervision of clients while away from the center, screening employment opportunities, and client progress evaluations.

2. Senior Correctional Officer and four Correctional Officers - these positions are responsible to the lieutenant for operation of the security desk, logging clients absences, and security of the center. In addition to normal security duties, the officers will be required to evaluate the daily progress within the center of each client.
3. Field Supervisor - this position is responsible to the Lieutenant for supervising the clients during their absences from the center. Perhaps the single most fact for failure of a client to adhere to the operational guidelines of a community center is the lack of field supervision. This person would be a roving inspector to check up on clients on a random basis.
4. Employment Counselor - this position is responsible to the Lieutenant for placement of clients with employers. The Employment Counselor will supervise placement, monitor job progress, write client progress reports, and provide assistance to the Field Supervisor.

General Fund monies are requested for all salaries.
