Helping Students Prepare For Postsecondary Success

More than two million college-bound students nationwide sat for the ACT Assessment in 2002. In Nevada, 7,674 students took the ACT. The ACT supports successful P-16 education by ensuring that all students have been introduced to:

- Transition activities for post-high school planning
- Standards-based testing that demonstrates what a student knows and is ready to learn next
- Information about the college-going process

ACT Assessment Highlights:

- Curriculum-based achievement measure in English, math, reading, and science
- Tied to national and state standards, including Nevada's Content Standards
- Norm referenced and criterion referenced
- Identifies student academic strengths and areas needing improvement*
- Used widely for college admission, course placement, and advising
- Helps students choose college majors and careers
- Includes Instructional Support tools for early academic intervention
- Proven long-term and short-term test preparation
- Reduces the need for remediation at the college level

*To understand the meaning of an ACT score, refer to ACT's Standards for Transition at www.act.org/standard. ACT standards are curriculum-based statements supported by research and closely aligned with Nevada's Content Standards.
