Port of Entry Study Update

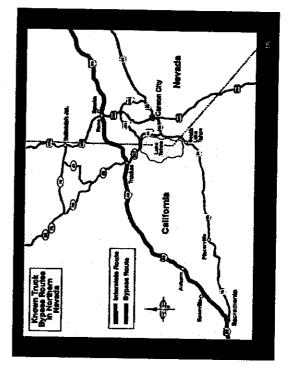

Preliminary Port of Entry Study Results

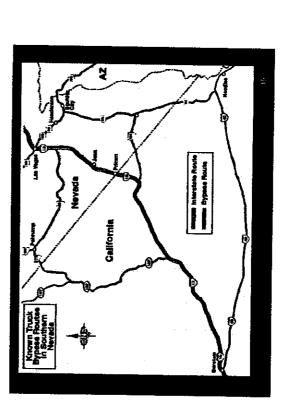

· Nevada-Only Port

- Because of legislative interest in ports of entry, the Jean study is being updated.
- Because our fee structure has not changed since the study was done in 1993 and trooper salaries and construction costs have risen significantly, preliminary results show poor economics.

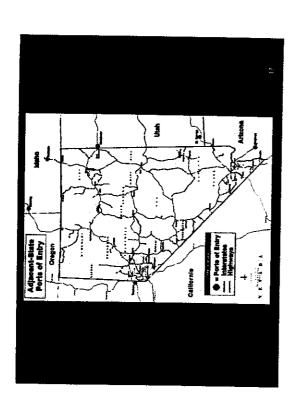

9

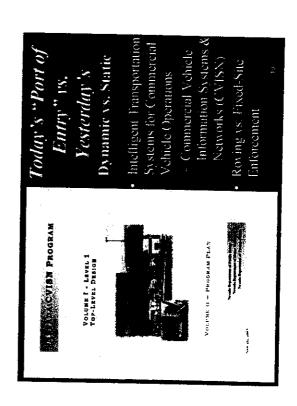

Systembres Benefit Cost Ratio 0.37 • Joint California/Nevada Port Amual Renefits \$3.2 million Annual Costs \$5.9 million Benefit Cost Ratio: 0.54

M-4 of 12

Effect of Adjacent-State Port of Entry Locations

- 1993 commodity study, 80% of trucks traveling our Interstate have an origin and destination outside Nevada and are inspected in an adjacent state.
- If we had ports of entry at all interstate borders
 the trucks we inspect that were not already being
 inspected in a neighboring state represents only

 ?" of Nevada truck travel

PRELIMINARY

Summary of Annual Benefits and Costs For a Nevada-Only Port of Entry on I-15 Northbound Near Jean, Nevada

Benefits

Temporary License & Annual Registration	\$ 217,000
Hazardous-Materials Permits	36,000
Overdimensional Permits	1,000
Fines / Bails	722,000
Court Assessments	433,000
Accident Reduction	143,000
Increased Pavement Life	477,000
Fuel Tax Audits	111,000
Total	\$ 2,140,000

Costs

Annualized Construction Cost	\$ 1,756,000
Operating Costs:	
Salaries & Benefits	2,584,000
Officer Equipment (annualized)	42,000
Officer Training (annualized)	341,000
Computers and Communications	325,000
Supplies / Utilities / Maintenance	328,000
Court and Related Costs	433,000
Total	\$ 5,809,000

Difference

Annual Benefits Less Annual Costs = 2,140,000 - 5,809,000 = (3,669,000)

Benefit / Cost Ratio

Annual Benefits Divided by Annual Costs = 2,140,000 / 5,809,000 = 0.37

Practicality of Ports of Entry in Nevada

Bill Draft Request 83 for the 2003 Nevada Legislature would require ports of entry (POEs) at certain Nevada borders. To help the Legislature make an informed decision, we are compiling and analyzing relevant information regarding the practicality of such facilities. Some salient points evolving from that ongoing analysis have been compiled for presentation to the State Transportation Board at its Jan. 28, 2003 meeting:

- Nevada already has 24 truck inspection stations, with 11 of those located on the Interstate system. Reasonably, eight of those facilities could be operated on a 24hour basis for about a week.
- Under its Intelligent Transportation Systems for Commercial Vehicle Operations (ITS/CVO) program, Nevada has designed systems that reduce the dependency on fixed ports of entry. Nevada, like the rest of the nation, is designing and implementing electronic screening, credentialing, and safety-information-exchange systems that replace or reduce the demand on traditional port-of-entry functions. As electronic systems evolve, in addition to information about the truck, we will probably receive real-time information regarding the condition of driver. Although such systems may sound farfetched, they are already operational in advanced trucking operations and may be required under homeland-security provisions in the next federal highway bill.
- A 1993 benefit/cost study prepared by NDOT showed Nevada would recover 74 cents of each dollar spent annually on a POE on I-15 south of Las Vegas. Considering that costs (e.g., construction, right of way, and salaries) have grown at a higher rate than benefits (e.g., fines, fuel taxes, and registration fees) since 1993, a planned update of that study will likely show an even lower benefit/cost ratio.
- A 1993 NDOT commodity-flow study revealed that nearly 80 percent of trucks operating on our Interstate have an origin and destination outside of Nevada and are already being inspected at a POE in an adjoining state.
- The number of trucks that would be subject to inspection at a POE on I-15 south of Las Vegas that are not already being inspected at a POE in another state represents less than 2 percent of the commercial truck travel in the State.
- If POEs were constructed at all Interstate border crossings, the number of trucks that would be subject to inspection that are not already being inspected at a POE in another state represents less than 7 percent of the truck travel in Nevada.
- Previous studies have shown that the operation of POEs result in a significant diversion of trucks to alternate routes that are poorly suited for truck operations. Preferably, the trucks should travel on Interstate and other relatively safe routes that have been built to handle aggressive loads. Alternate routes likely to be adversely affected by diversion of both legally operating and illegally operating trucks resulting from POE operations on the Interstate include U.S. 50, U.S. 93, U.S. 95, U.S. 395 and numerous State Routes.
- Vehicle size and weight enforcement statistics have historically shown that the commercial-vehicle violation rates in all categories monitored are lower on the Interstate system than any other roadway classification in Nevada. These

- statistics have also shown that targeted mobile, or roving, enforcement is a much more effective strategy than stationary enforcement at fixed sites.
- Currently 51 uniformed trooper positions are allocated for commercial-vehicle
 enforcement statewide (9 of those positions are vacant and 7 others are assigned
 other full-time duties outside of commercial enforcement). A POE would require
 a minimum of 16 troopers to operate continuously, or about one third of our
 existing 51 commercial trooper positions (or about half of the 35 currently active
 commercial troopers).
