Petition to Support Health Plan Coverage for Clinical Trials

We, the undersigned, urge our Legislators to approve Assembly Bill 502, which would require insurance companies in Nevada to cover the cost of clinical trials for patients with life-threatening illnesses, such as cancer, HIV, and heart disease, to name a few.

Our community benefits from clinical trials, which not only allow patients access to breakthrough treatments, but which also form the basis for progress in treating illnesses, a progress which benefits the community as a whole. Most people will at some point in their lives benefit from a past clinical trial, as most modern treatments have been proven through such trials.
