AN ACT relating to energy assistance; authorizing the Division of Welfare and Supportive Services of the Department of Health and Human Services to use money in the Fund for Energy Assistance and Conservation to assist certain low-income households in paying for Internet service; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law requires certain customers of an electric or gas utility to pay a universal energy charge of 3.30 mills on each therm of natural gas purchased for consumption in this State and 0.39 mills on each kilowatt-hour of electricity purchased for consumption in this State. (NRS 702.160) Under existing law, the Public Utilities Commission of Nevada collects the universal energy charge and, after deducting its administrative charge, deposits the remaining money collected for the universal energy charge in the Fund for Energy Assistance and Conservation. (NRS 702.160, 702.170, 702.250) Existing law requires 75 percent of the money in the Fund to be distributed to the Division of Welfare and Supportive Services of the Department of Health and Human Services for programs to assist certain low-income households in paying for natural gas and electricity. (NRS 702.260) The remaining 25 percent of the money in the Fund must be distributed to the Housing Division of the Department of Business and Industry for programs of energy conservation, weatherization and energy efficiency for certain low-income households. (NRS 702.270) **Section 2** of this bill authorizes the Division of Welfare and Supportive Services to use money from the Fund distributed to the Division to pay for programs to assist certain low-income households in paying for Internet service. **Section 2 also provides that the amount of assistance received by a household to pay for Internet service must: (1) equal the lowest cost available for Internet service in the area that the Internet service is being provided; and (2) exclude any costs for cable or satellite television service, including, without limitation, joint packages that provide Internet service with cable or satellite television service.**

21 Existing law provides that certain persons who are exempt from paying the universal
22 energy charge are not eligible to receive assistance from the Division of Welfare and
23 Supportive Services for utility service or from the Housing Division for energy conservation,
24 weatherization or energy efficiency. **Section 1** of this bill specifies that a person who is
25 exempt from paying the universal energy charge is not eligible to receive assistance from the
26 Division of Welfare and Supportive Services in paying for Internet service.
