Explanation

(Use Additional Sheets of Attachments, if required)

The Division has reviewed this BDR and determined that any anticipated impact in system changes to the agency could be absorbed. The Division also assumes that any services covered by entities under this bill would be eligible under an existing provider type and that any coverage requested of Medicaid under this program would be for existing Medicaid benefits approved for federal share by the federal government as in lieu of service in managed care, a statewide benefit under the State Plan, or another benefit established and approved by federal government under an existing waiver program. Nevada Medicaid cannot pay for billing codes for services that do not align with the benefits or services authorized by the federal government.
