### Explanation

(Use Additional Sheets of Attachments, if required)

If enacted, the proposed legislation would create the Charter School Facilities Account in the State General Fund. The Department has determined there would be a fiscal impact to implement the proposed legislation. The Department estimates it would cost \$224,298.10 in FY24 and \$157,507.82 in FY 25. These costs were determined based on: 1 EPP to monitor the funding based on per-pupil data and to ensure compliance with any capital projects these funds are intended to be used for. Additionally, the Department would need to enter into a contract to gain the ability to collect data regarding students that are temporarily conducting distance education and \$20,000 to maintain that system every year thereafter. The Department would also need to enhance the current student information system to provide reporting at the required level identified in section 1(3)(a)(2) of the bill because the current reporting platform has no mechanism to access the number of days that a distance education student is in a school building versus remote instruction. Subsequent training and support for LEAs regarding how students are coded into Information Campus (See: Contracts and OT). Additionally, the Department would need to promulgate regulations regarding the practical mechanisms of this payment, and subsequently build out policies, internal controls, processes, and spreadsheets to integrate these payments into current processes related to school payments, apportionment, validation of FRL students.
